

**EITA is a European non-profit organisation officially created in 1998 by trained and licensed road and air transporters and logistics providers, specialized in the transportation of radioactive isotopes, mainly used for medical purpose and/or research.**

**EITA's key objectives are:**

- To ensure high quality of handling, packing and transport of radioactive isotopes
- To ensure total safety, security & traceability during the transport and/or handling of radioactive isotopes for the environment and the population
- To represent the transport and logistics industry and keep contact with the concerned authorities to obtain harmonisation of the different national, international and European policies, regulations and other related initiatives
- To give the members of EITA the opportunity to represent their interests and to exchange all legal information and skills to achieve quality within the Association

## **EITA Organization**

The Association is managed by a Secretary-General and a Board of Directors to be elected by the General Assembly.

Each year an annual General Assembly will be organized, however the members meet at least twice a year.

[www.eita.org](http://www.eita.org)

## Activities

- 2 member meetings per annum
- Organisation of symposia on medical isotopes in cooperation with other organisations such as SCK-CEN
- Representation of EITA at conferences, such as the EANM conference [European Association of Nuclear Medicines]
- Cooperation with AIPES [Association of Imaging Producers & Equipment Suppliers]
- Cooperation and contacts with national and international organisations and authorities
- Member of the EC Standing Working Group on Safe Transport of Radioactive Material
- Organisation of Working Groups, like Quality label

## Member's Benefits

- Be informed on the latest changes in the regulations concerning the transport and handling of radioactive materials
- Be updated about the latest developments in the radioactive field
- Have a voice in determining positions
- Share experiences and expertises amongst the members
- Possibility to participate at selected events and symposia at reduced fees
- Access to EITA members-only meetings

## Membership Application

Candidatures for membership are evaluated by the Board of Directors and the General Assembly.

Can be admitted as an EITA member, any company that

1. is active in the business and/or handling of isotopes;
2. is in possession of all required legal permits, licenses and authorizations;
3. complies with all national, European and international rules and regulations to which its activities are subject;
4. meets the criteria defined by the General Assembly.

Please contact the Secretary-General of the Association if you are interested in an application.
